

Pro-Tec Your Investment.

Protecting your new billiard cloth from unsightly spills and stains can be a problem. That's why we developed a unique, durable protectant especially for worsted wools and flannel cloth. Unlike topical silicon coatings, Pro-Tec works by penetrating and sealing each individual fiber deep down where stains occur. Pro-Tec provides durable protection against such tough stains as beer, soda, solids and grease.

When spills occur, simply blot Pro-Tec treated fabric with an absorbent towel. Laboratory tests have shown that Pro-Tec actually increases fiber strength and gives you lasting resistance to abrasion and wear - to add years of life to your playing surface. This one-of-a-kind formula does not change the texture of the fabric, and never leaves a sticky residue or yellowing film. It is non-allergenic and 100% environmentally safe.

Ask for Pro-Tec. Preserve the new look of your billiard cloth and "Pro-Tec" your investment for years of playing enjoyment!

Spills on untreated cloth leave an undesirable stain.

After one treatment with Pro-Tec spills easily blot clean.

Product Information

King of Billiards

Technologies & Innovations

- Protects cloth from permanent stains through misting system
- Bonding agents deeply penetrate and seal each individual fiber
- Increases fiber strength for resistance to abrasion and wear
- Simplifies routine cleaning
- Leaves no sticky residue to impede playing surface
- No change in color or texture
- No shrinkage or dimensional change in cloth
- Non-yellowing formula
- Non-allergenic
- 100% environmentally safe - petroleum-based, contains no I.I.I. Trichlor
- Does not change fabric flammability rating
- May be applied to any clean cloth or fabric top after installation
- Treated surface may be used after just 6 hours drying time, but for best results allow 24 hours for surface to "cure"
- Will not void manufacturer's warranty
- Will not wash or wear off surface
