

TV TOUR EDITION

CENTENNIAL[®] POCKET BALLS

Brunswick Centennial Pocket Balls TV Tour Edition is of the same legendary quality as all Centennial balls.
This popular new edition was created to reduce the confusion in ball color during television broadcasts of professional matches.

TV TOUR EDITION
CENTENNIAL® POCKET BALLS

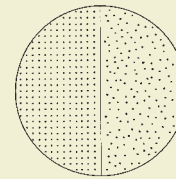

DESIGN

A new edition of the famous Centennial Pocket Balls was created because some of the original colors are difficult to differentiate during television broadcasts of professional matches. The originals are still available, but this new edition is unique and fun.

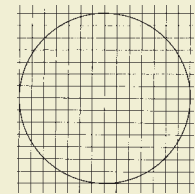

The set includes pink #4 and #12 balls (instead of purple) and brown #7 and #15 balls (instead of brick red).

PERFORMANCE

Premium grade phenolic versus conventional polyester resin

Radial tolerances of 0.001 of an inch

Centennial Pocket Balls are the standard of excellence in the industry. Made with premium-grade phenolic resin, Centennial balls are ground and polished to exacting radial

tolerances of 0.001 of an inch for absolutely true and accurate roll. Components are solid cast and “vitrified,” or

Solid cast components

heat fused, for a homogeneous molecular bond. A translucent ivory hue, lustrous color, and a unique “dart” identify Centennial Balls.

With resiliency and balance that allows hairline accuracy, and with numbers and colors that will not rub off, spot, or fade, Centennial Balls are superior in both playing quality and appearance.
